CAREER OBJECTIVE

Information Technology graduate with hands-on experience in software development, system implementation, and business process analysis. Skilled in understanding business requirements, identifying practical solutions, and translating business needs into effective technology solutions. Seeking opportunities to leverage technical and problem-solving skills to support business operations, improve processes, and create meaningful value through technology.

WORK EXPERIENCE

ERP Implementation Developer | Dynamics Motions **May 2026 – Present**

- Odoo ERP Implementation: Collaborated with consultants and clients to analyze business requirements and deliver solutions across Odoo modules.
- Solution Development: Translated business requirements and workflows into customized ERP solutions, supporting processes from CRM and customer management through order fulfillment and delivery.
- System Integration & Development: Developed and customized Odoo functionality to align with business processes and implementation requirements.
- Client Collaboration: Participated in client meetings, requirement discussions, solution planning, testing, and issue resolution throughout the implementation lifecycle.

Full-Stack Developer (Intern) | tohome.com **Apr 2025 – Oct 2025**

- AI & Automation: Architected and integrated an AI-powered content generation pipeline using LLMs, dramatically scaling SEO-friendly content creation.
- System Architecture: Engineered high-performance backend APIs utilizing Node.js and RabbitMQ for asynchronous task handling, ensuring zero downtime during high traffic loads.
- Conversion Optimization: Analyzed real user behavior to redesign key UX/UI components, directly reducing drop-off rates and increasing user conversion.
- Internal Tooling: Revamped the custom CMS dashboard, significantly reducing content management time for non-technical teams.

SPECIALIZED PROJECTS

OSGED (Cognitive & Depression Assessment) | Next.js, FastAPI, Deep Learning (ConvNeXt, LSTM)

- Developed an end-to-end web application for cognitive health assessment, integrating deep learning models for real-time facial emotion analysis.
- Conducted real-world UAT with 100+ elderly users and deployed the application on GCP using Docker.

EDUCATION

Information Technology - King Mongkut's Institute of Technology Ladkrabang 2022 - 2026

- Bachelor of Science Degree, Software Development Track | GPAX: 3.22

TECH SKILLS AND CERTIFICATIONS

- **Frontend:** JavaScript, TypeScript, React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Python, Java, PHP, FastAPI, Django, RabbitMQ, RESTful APIs
- **Database & ORM:** PostgreSQL, MongoDB, MySQL, Prisma
- **Cloud & DevOps:** Docker, Jenkins, Google Cloud Platform (GCP), AWS, Git
- **AI & Machine Learning:** Deep Learning (CNN, LSTM), NLP (Dialogflow), Computer Vision, Image Processing

Certifications: HCCDA-Tech Essentials | Huawei Cloud, Cybersecurity Essentials | Cisco Networking Academy
